Risk Analysis

What drives default risk across grade, purpose, and pricing

Default Rate by Grade

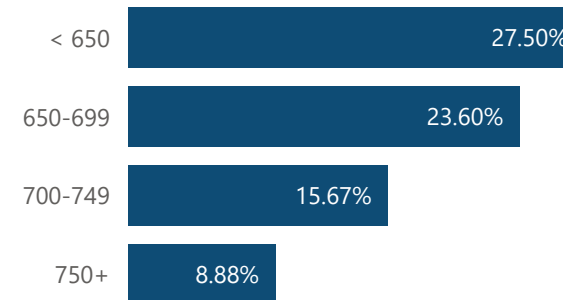

Default Rate by State

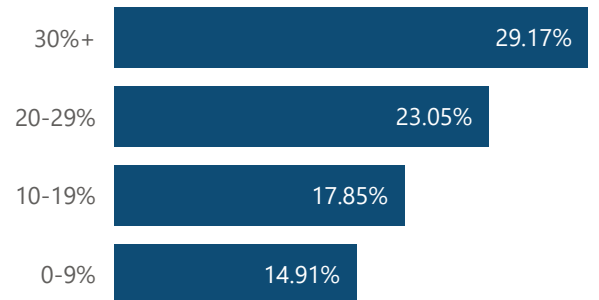

Default rate rises consistently from Grade A → G, and tracks as expected with DTI and FICO, validating these as real risk signals. One exception: education and wedding loans default less than other purposes even at lower grades, suggesting purpose carries risk information independent of grade.

Purpose	A	B	C	D	E	F	G	Total
car	5.17%	11.16%	18.64%	25.54%	31.96%	42.25%	50.94%	14.69%
